The application has been annended as follows:

IN THE CLAIMS:

Claim 3:

In claim 3, change "cylindri al in shape" to --a can-shaped container--.

Claim 4:

In claim 4, line 1, before "c aimed" change "a" to -as--.

In the replacement abstract on page 3 of the amendment filed on 10/16/01:

2. The following is an examiner's statement of reasons for allowance:

The present invention claims a metal-air cell having a container with a spring disposed on an upper interior surface of the container such that when the spring is compressed, an air inlet is formed to introduce air for electrochemical reaction and when the spring is expanded, the air is obstructed.

The closest prior art of record, Derksen (USP 2,468,430) discloses a spring that is used to hold the battery and lamp in place in a battery case and a push button is provided on the battery case to allow oxygen into the battery case without movement of the spring but does not disclose, teach or suggest that the spring expands or is compressed with the application of a force or removal of a force, respectively.

Any comments considered recessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications should be directed to examiner Susy Tsang, l'h.D. whose telephone number is (703) 305-0588. The examiner can normally be reached on Monday through Friday from 9:30 AM to 6:00 PM.

No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself

It is the responsibility of the applicant or the atto ney or agent to make the substance of an interview of record in the application file, unless incomplete through the failure to record the substance of interviews. the examiner indicates he or she will do so. It is the exam ner's responsibility to see that such a record is made and to correct material inaccuracies

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the which bear directly on the question of patentability. interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal Interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the concusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If ixiditional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promp ly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action) not restrict further action by the examiner o the contrary.

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case unless both applicant and examiner agree that the examiner will record same. Where the examiner agrees to record the substance of the interview, or when it is adequately recorded on the Form or in an attachment to the Form, the examiner should check the appropriate box at the bottom of the Form which informs the applicant that the submission of a separate record of the substance of the interview as a supplement to the Form is not

It should be noted, however, that the interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following app icable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the 3) an identification of the specific prior art discussed, Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner, (The identification of arguments next not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and 7) if appropriate, the general results or outcome of the Interview unless already described in the Interview Summary Form completed by

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her.
